

# Waterdog Computer Works NextGen Firewall from Barracuda: Advanced Network Security Made Simple

## Overview

This powerful turnkey solution provides robust protection to secure multiple networks from advanced threats — all from one centralized management console.

## Key Solution Advantages

Optimize the security, performance, and availability of your networks

- **Centralized control** makes it easy to deploy across multiple locations
- **Intelligent traffic regulation** prioritizes critical system performance
- **Powerful Advanced Threat Detection** and dual antivirus engines, combined with IDS/IPS, protect against malware, ransomware, and zero-day exploits

## Integrated Next-Generation Security

The Waterdog Computer Works NextGen Firewall from Barracuda is designed and built from the ground up to provide comprehensive, next-generation firewall capabilities. Cloud-hosted content filtering and reporting offload compute-intensive tasks to the cloud for greater resource efficiency and throughput. Based on application visibility, user-identity awareness, intrusion prevention, and centralized management, this firewall is the ideal solution for today's connected businesses.

## Regaining Control of User Activity

The Waterdog Computer Works NextGen Firewall from Barracuda extends security coverage beyond network boundaries and makes it easy to monitor and regulate your network and everything users are doing.

## Key Features

### Advanced Security

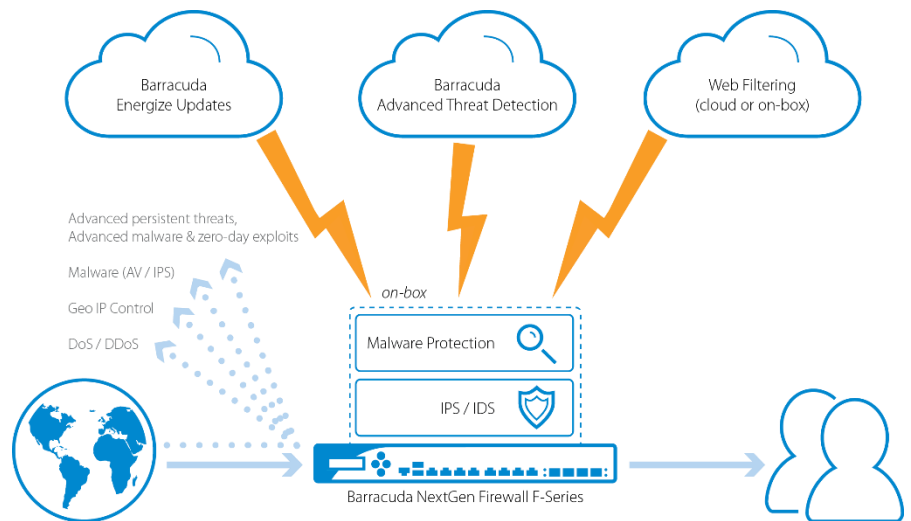

**Firewall** – Application control and granular application enforcement; interception of SSL/TLS encrypted applications

**User Identity Awareness** – Supports authentication of users and enforcement of user-aware firewall rules; works with a variety of authentication methods including Wi-Fi access point vendors like Aerohive, Aruba, and Ruckus

**Intrusion Detection and Prevention** – Comprehensive real-time protection against exploits, threats, and vulnerabilities

**Advanced Threat Detection** – Dynamic analysis of malware programs and documents with embedded exploits

**Malware Protection** – Shields the internal network by scanning web content, emails, and file transfers

### Simplified Operations

**Fast and Easy Troubleshooting** – Real-time information and comprehensive logging capabilities

**Easy-to-read Reporting** – Enables us to automatically create reports for you on all deployments or select deployments

**Comprehensive Traffic Optimization** – Intelligent traffic regulation and tightly integrated Quality of Service (QoS) and link balancing capabilities

**Remote Access** – Browser-based SSL VPN, dedicated VPN clients, and Network Access clients; remote access app, featuring Barracuda's Zero-Touch Deployment
